- Familiarity with working on both local and cloudbased development environments and IDEs

## | Experience

*Student Worker at Rogue Community College IT Help Desk*      November 5th, 2014 – June 11th, 2015

Duties included re-imaging computers for distribution to faculty members, helping out faculty when they experience problems with the computer, providing instruction to students in need of help with logging on to college computers or resetting passwords. Worked on Windows 7 and Windows 8 operating systems and gained a basic understanding of how to work with a large network environment.

*Freelance Smalltime Web Developer*      October 30th, 2014 – Present

Built an organized CMS resource manual for a non-profit organization in Portland OR. Lead a team of 6 in the development and design of a website with content management capabilities and current web standards built with the Laravel MVC framework. Creator, developer and designer of a Scrum "Flip Board". Project was built with Ruby on Rails MVC using good conventions and use of RESTful resources, with a full connection to a backend database and the utilization of a WYSIWYG Ruby gem. Ongoing Management and updates of content on existing Wordpress website for House Alive LLC.

## | Education

*Associates of Applied Science Degree, Web Development*      October 1st, 2013 – June 15th, 2015

Maintained a 3.78 GPA throughout the program.
